

Parkfield Home Learning Offer Parent Questionnaire June 2020

Would you prefer worksheets for your child?

93 responses

We will begin sending out a pack of worksheets for the remaining six weeks of this half-term to supplement some of our online offering.

Does your child find the zoom meetings beneficial?

91 responses

It's great to hear that so many of you are liking these sessions – to think how nobody had heard of Zoom three months ago!

Would your child watch a weekly assembly by one of our teachers?

93 responses

We will now be sharing a weekly Achievement Assembly on a Monday, showcasing and celebrating some of the fabulous work children are doing, along with any fun activities they're doing too.

How do you think how home learning offer could be improved (being mindful that teachers are now back in school during the day with eligible pupils)?

Don't need to improve they are doing a fantastic job

It's been brilliant thank you. Like the daily tasks set to help with structure

I think everything what you do for our children in this difficult time is brilliant and good enough!

Keep up the good work.

I don't, I think you just got to make the best out of a bad situation you are all KEYWORKS and doing an amazing jobs, thank you

I think the work that is being set is fine

I think everyone is doing a brilliant job. Thank you.

I think all teachers are doing a brilliant job! & doing the up most best they can at this uncertain time.

Thank you for all these kind comments! It's been a challenging time for the staff in school as several staff have been shielding, whilst the rest have either been running the provision at Little Heaton or involved with the risk assessments/setting up of Parkfield for phased re-opening. Time has been very limited with many working during the Easter and May holidays too so it's nice that our current efforts are appreciated.

Think stuff uploaded is great, more getting my child motivated as has lots of other things at home he is enjoying, learning drums, cooking and baking are things we don't normally have as much time to do.

We fully appreciate how the lockdown has changed the balance of how much academic work children are doing at home, and the challenges that home schooling brings. We've loved seeing photos being shared on Showbie and Tapestry of children learning new skills and doing fun activities at home during lockdown and feel that these sorts of things really help children through a difficult and emotional time. Please keep sending them in and spend your time doing what you feel is best for your family.

If there are any taught lessons going on at school, maybe kids at home could watch and complete tasks at home.

Maybe some of the lessons the students in school are getting could be done via zoom for the children at home too

Current provision in school involves children in bubbles of mixed-year groups, sometimes with staff unfamiliar with that classroom. No new teaching is happening – children are just accessing copies of the materials already being provided online to consolidate existing knowledge. We therefore feel that any videoing of this would be unnecessary.

Work being set is work that she says has historically been done and therefore was becoming very bored and losing the want to do work with what the school has been issuing out.

Due to the wide range of settings children are currently in, both at home and in school in different classrooms all mixed up, it would be very challenging to ensure that all children have full access to any new learning content. When we return to school our focus for all our pupils will be on new learning and covering objectives that would have been covered this summer term.

Maybe children from home could join in lessons via zoom?

Weekly big maths zooms

Weekly spelling zooms

Spellings done like at school. Maybe thro Zoom with the kids in school. Maybe teacher could read a story and have a discussion afterwards. Think more interaction even if it's small groups with teacher or TA would help.

Zoom lessons every week on maths and English

We will now be offering a weekly Zoom Spelling and maths quiz for children to take part in to hopefully give the sessions more of a focus. Teachers will also be recording a weekly story reading for children to enjoy.

Work books, printed templates and resources also books based on the summer term topics, reading books.

We are unable to facilitate the sending home of reading books under the current coronavirus health and safety restrictions. A reminder though that <https://www.oxfordowl.co.uk/> does contain many free e-books to read.

I think some guidance is needed as to how much work is expected of each child. There is a vast amount of tasks to complete and it's not possible to complete them all and it might be better to set certain work which you expect the child to complete with then optional work to complete if they wish or if they get bored

All the work set is only suggested and we have tried to offer a range of options so children can do what they feel they can access best – there is no expectation that children should do everything.

Set worksheets would be a good idea.

Having work sheets to complete would be more beneficial to us than completing online tasks .

For me being sent work sheets and books would of been easier

Please my child needs a work sheets or paper work. Thanks

I think if she had a 'pack' to complete she'd be more inclined to do it.

Any work that I could print out for her would be great.

We need packs of things to complete in addition to all the web based work as we don't have a printer.

A pack of worksheets has been created for the last six weeks of this academic year which parents can collect next week. Children currently in school will be using these same sheets so they have access to the same content.

Mixture of both online and worksheets.

The majority of our online learning offer is remaining – we've had many children doing work on Mathematics (Y1-6) and LBQ (Y5/6), along with lots of children sharing photos of work they've done on Showbie/Tapestry, for example.
