Y1 Mathletics Session - September 2021

Thanks to the 15 parents/carers that attended our Mathletics session with Y1 this week. The responses below demonstrate what a few of you thought of the session.

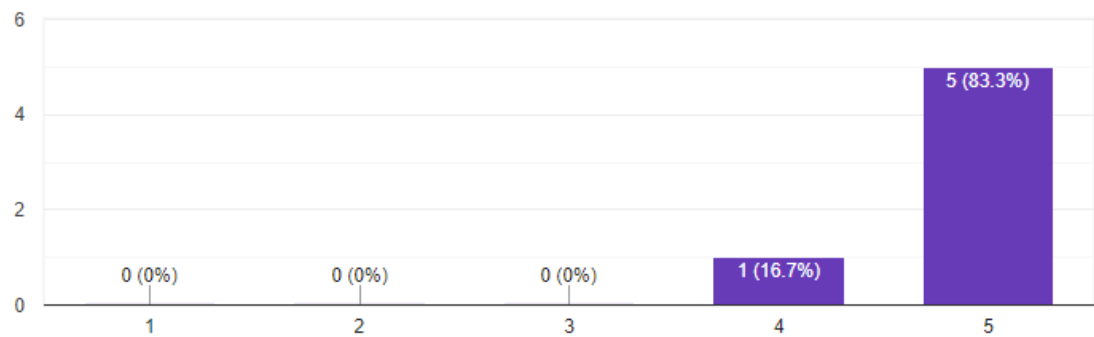

How much did you enjoy session?

6 responses

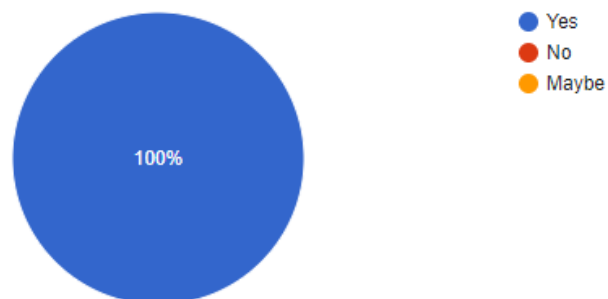

How useful was the session?

6 responses

Would you attend a similar event in future?

6 responses

What did you like about the session?

The fact that it was fun yet informative event, an opportunity to meet staff and see your child interacting in school environment.

Fun and very constructive, nobody gets left behind

Great to have the chance to be in school with other parents and teachers

That my child could join in with me and show me how well he is doing

What could we do to improve the session?

Just a suggestion, a similar session on phonics and reading/writing skills would be great! Thank you for your efforts!

Don't know, it is very well put together!

Maybe have a session that included all the apps/online tools the children use so parents know how to navigate them all.

Thanks for your positive responses – I am happy that you found the session useful and I hope that you are now more confident in supporting your child with Mathletics at home. For those that were unable to attend, I hope the resources emailed to yourselves were of some use.

We will continue to look at the different types of workshops that we can offer parents and carers and hope to invite you back into school soon.

Thanks again,

Mr Kemp
